

Medical Management Center

- What is the MMC?
- What is MNR?
- Who is a candidate?
- What can the Command do?
- Command Referral Form

MAR2 = MOS Administrative Retention Review
MEB/PEB = Medical Evaluation Board/Physical Evaluation Board
MMC = Medical Management Center
MMRB = MOS Medical Retention Board
MNR = Medically Not Ready
RTD = Return To Duty
WCTP = Warrior Care and Transition Program
WTB = Warrior Transition Battalion
WTU = Warrior Transition Unit

Medical Management Center

The Medical Management Center is a MEDCOM directed program to decrease the MNR Soldier population with the goal of returning Soldiers to duty as soon as possible.

The MMC will:

- Facilitate the medical management of MNR Soldiers
- Decrease Soldier recovery time after injury or illness
- Decrease the time to identify Soldiers requiring MEB/PEB.
- Facilitate timely entry into the MEB/PEB for those Soldiers not able to RTD.

Medical Management Center

Any Medical Readiness Classification (MRC) that results in MEDPROS reporting Soldier as MNR:

MRC3A: Dental Readiness or Profile rating of 3 or 4 <31 days

MRC3B Soldiers require time-intensive MNR medical mgmt.

Priority MRC3B cases for the MMC include:

- Soldiers with a *temporary profile*, **3** or **4**, that has existed for longer than **30 days** and prevents Soldier from full functionality in MOS/AOC.
- Soldiers with *permanent profile*, **3** or **4**, that has **not** reached Soldier's MRDP & **not** undergoing a MEB/PEB or MMRB/MAR2.

Medical Management Center

The MMC process is ***not*** required for Soldiers that are undergoing an MMRB/MAR2, on convalescent leave less than 30 days, conditions of pregnancy or HIV, or for conditions that were adjudicated by MEB/PEB or were granted a waiver for a pre-existing condition.

8A MSCs are crucial to the success of the MMC by identifying MNR Soldiers to be enrolled in the MMC.

Medical Management Center

A Commander may refer a Soldier to the MMC when the Commander identifies that the Soldier has a temporary profile of 3 or 4 greater than 30 days.

A Commander may refer a Soldier as a candidate for the WTU to the MMC Director when the Soldier is active duty, and his/her recovery will take longer than 6 months, and he/she requires complex nurse case management or meets WTB entrance criteria as outlined in the [WCTP guidelines](#).

Profiles requiring MEB shall be referred to the MMC in order to facilitate the MEB process. If a Soldier does not meet retention standards through MAR2, then the Soldier will be referred to the MMC to initiate the MEB/PEB.

Medical Management Center - Korea

MMC Administrative Office: Rm 1505 BAACH
Hiring Action in Progress **737-MMC-K (6625)**

Sr. Nurse Case Manager: Rm 1505C BAACH
Mr. Monte D. Hargrave **737-6626**
